

SteriHealth drives expansion plans with integrated ERP system

Fenwick Software, tegos partner for the markets Australia and New Zealand with headquarters in Melbourne, recently announced the start of a new enwis) project. With SteriHealth, Fenwick was able to gain a major customer from the subsegment biohazardous waste which is significant for enwis).

implementation of the solution in the field of biohazardous waste management in the healthcare sector, Fenwick has entered another subsegment and increases the presence of enwis) in the Australian market.

SteriHealth offers products and services specifically for companies in the healthcare sector and pharmaceutical industries. One of the most important services of SteriHealth is the collection and disposal of biohazardous waste that is, for instance, produced by hospitals and is subject to particular regulations due to danger of infection.

Since SteriHealth plans to expand its business further in the future, the company decided to implement a new IT solution and thus create a stable basis for further growth. The array of different IT systems that is currently used across various divisions is to be replaced by one completely integrated solution.

“enwis) will enable SteriHealth to provide a fully integrated workflow, from Contract to Weighbridge to Disposal to Invoicing to General Ledger,” said David Pietsch, project manager at SteriHealth. “Among its many features, enwis) supports multiple sites and has sophisticated functionality for rental invoicing and tracking options. We also hope to ultimately implement enwis)tel – the integrated telematics option”.

“We can move forward with confidence knowing that enwis) is a proven solution used by major waste management companies around the world”, said SteriHealth Executive Director Markus Koch. Internationally, enwis) is already used successfully by about 200 waste and recycling management companies with different specializations. With the
